Players not linked to parents

When to use

Follow this process to add missing family relationships. That can be parent and child, siblings, wives and husbands plus many others.

GMS allows you to link people with different surnames etc

Required information

A way of identifying the people, could be names, date of birth, email address.

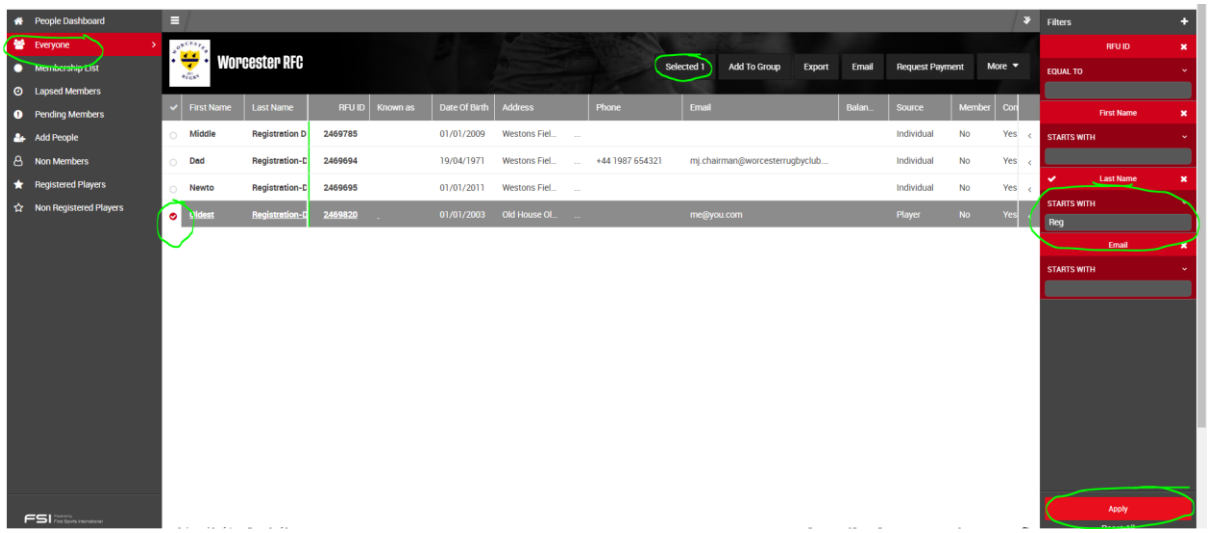

Process

In the example below I will relate two people with different surnames, it's obviously easier when they have the same name.

Log into GMS, access people App

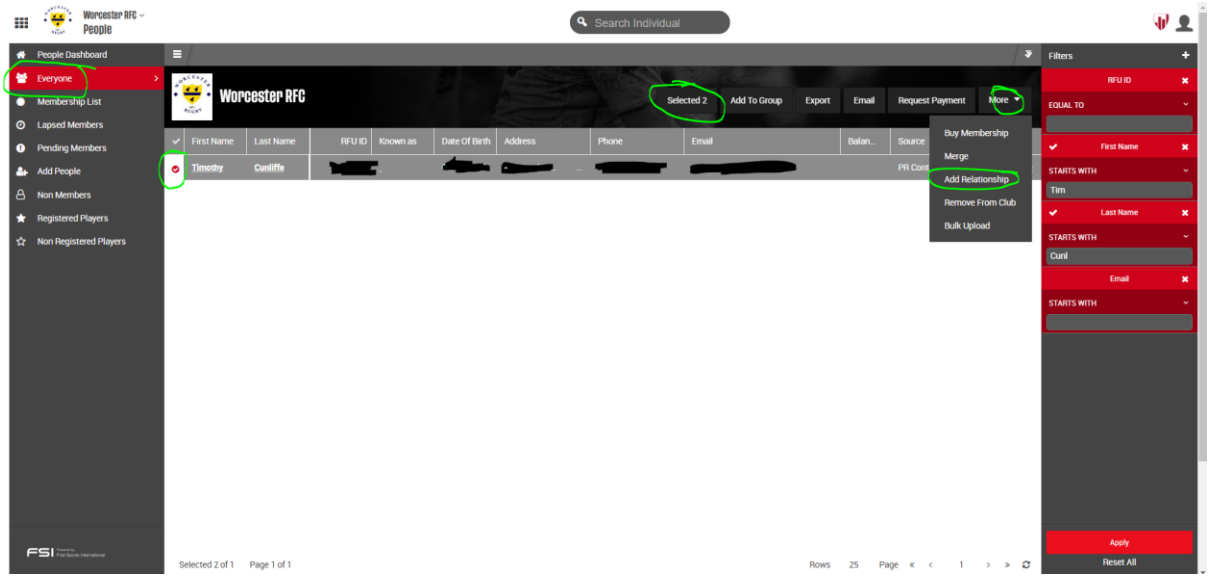

Select Everyone

Use filters on the right to find the first person. Click the row you want to relate. You will notice "Select 1" appears at the top

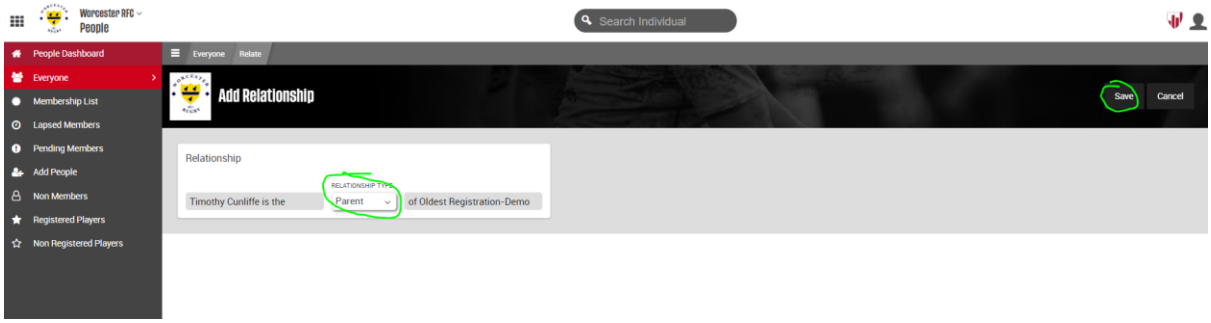

Search for the second Person using Filters. When you tick this row, “Select 2” will appear. If you have more or less than 2 “Add Relationship” will not appear.

Click More > Add Relationship

Select the appropriate relationship and click save

Process complete
